How to move the typing program

1. Copy the folder named 'Python Typing' to the clipboard
2. Hit paste in the desired destination
3. Wait for the program to copy
4. In the new destination, browse to PythonTyping>ProgramFiles>Save Location.txt and open the text document
5. Change the path in the text file to reflect where the PythonTyping folder is. For example. If you wanted to save it on John's desktop, you would type C:\Users\John\Desktop\PythonTyping\
6. Be sure to include a \ at the end of your file path
7. Save and close the Save Location.txt file
8. Once you have moved the typing program, you are ready to install the typing program. Please see 'Installing the typing program on new computers' to learn how to install
